

Bed Bug Beware!

Bed Bugs are highly transferrable

Bed Bugs are a pest of exposure; they can affect anyone regardless of:

- Living Conditions
- Home Sanitation
- Value or location of property

Knowing how to spot the signs of a Bed Bug infestation can help prevent you from getting a problem in your home. Not everyone has symptoms from Bed Bug bites.

Please read **HealthLinkBC** article on Bed Bugs provided in this Newsletter for further information.

Snuneymuxw Members if you suspect you have Bed Bugs:

- ✓ Please call SFN Maintenance (James Wesley – 250-713-7402)
- ✓ Maintenance will set up an appointment for pest control (PCO) to come to your home.
