

Pest Control News

As you know there have been bait stations installed on all reservations for rodent control. We have received reports from our pest control company that there has been high activity on Woodhouse St, Raines Rd, and Prince Charles St. We would like to remind each home owner that we do need your help to try to control the mice/rat infestations.

You can help by:

- Removing any debris in the yard that can be a potential home for the rodents (tires, old mattresses, etc)
- Keeping the yard free of over grown grass, bushes etc
- Removing any food sources (e.g.: garbage being left outside)
- Repairing any points of entry where rodents can enter the home
